

Protectorshell-SP (Single Part)

Traditional clip-together Protectorshell convenience in a single-part design to minimize inventory and simplify underwater laying in poor visibility, etc. The clean, robust design you have come to expect from Protectorshell with added convenience and simplicity.

PS076-SP/500/09

Specifications

Segment Length - Overall	555mm
Effective Installed Length/segment pair	500mm
Minimum Internal Diameter	76mm - for cables up to 66mm diameter
Maximum External Diameter	190mm (widest points)
Wall Thickness	9mm
Material	Ductile Iron to ISO 1083
Tensile Strength / Elongation	400MPa / 15% elongation
Impact Resistance	12m Drop test or 26kg
Minimum Bend Diameter	4.0m
Weight per Segment	12.4kg
Weight per installed metre (air)	24.8kg
Weight per installed metre (water)	21.4kg
Fasteners	M12x50 Bolts and M12 Nyloc Nuts – Material: Stainless Steel G316/A4 Recommended usage: 1 pair per 10 metres of installed pipe
